---

PROFESSIONAL SUMMARY

Full-Stack .NET MAUI Developer with 2 years of experience building cross-platform desktop and mobile applications using C#, SQLite, and MVVM architecture. Currently working as a **Full Stack Web Developer Intern**, contributing to live project tasks within a collaborative development environment. Skilled in designing maintainable, user-centric software with responsive UI, local data persistence, and robust error handling. Additional experience in Unity game development strengthens problem-solving, UI/UX design, and software architecture capabilities. Focused on delivering reliable applications that improve workflows and user experience.

CORE TECHNOLOGIES
Languages: C#, SQL, HTML, JavaScript
Frameworks & Tools: .NET MAUI, .NET Core, REST APIs, MVVM
Databases: SQLite (local persistence)
Version Control & Practices: Git, GitHub, Testing & Debugging
Additional Skills: Unity 3D, C# gameplay systems, UI/UX design

---

Professional Experience

1.Full Stack Web Developer Intern | Weintern Pvt Ltd | Dec 2025 – Present

- Supporting development tasks across front-end and back-end components under team guidance
- Assisting with feature implementation, writing code of live projects, debugging, and testing of web-based applications
- Researching and applying relevant technologies and tools to meet project requirements
- Collaborating with team members on live projects through regular meetings, task updates, and reviews
- Following structured workflows, deadlines, and quality standards in a professional development environment

---

Individual Project Experience

1.Full Stack Developer | Buyzen – E-Commerce/Retail Platform | 2025 – Dec 2025 | Github
- Developed a modular e-commerce application using .NET MAUI with frontend and local backend functionality.
- Implemented user profile management, shopping cart, Wishlist, checkout, and order management modules.
- Created a sales & analytics dashboard and product management tools with bulk actions and inventory indicators.
- Designed a colourful, responsive UI/UX with thematic layouts and intuitive icons.
- Integrated support/help center and session persistence using MAUI Preferences.

Impact: Streamlined retail operations, improved decision-making with analytics, and enhanced user engagement.

2. Full Stack Developer | PillPilot – Medication Management Platform | Nov 2025 – Dec 2025 | Github
- Built a cross-platform MAUI app (Android, iOS, Windows) with medication tracking, alarms, and document uploads.
- Applied MVVM architecture with Observable Collection for real-time UI updates.
- Ensured responsive layouts, adaptive styling, and data validation.

Impact: Improved medication adherence and streamlined user workflows; foundation for health-tracking features.

3.Full-Stack Developer | StravigoAI - Consultancy Workflow Platform |Aug 2024 – Nov 2025 | Github

AIpowered consultancy workflow software delivered using .NET MAUI (Android + Web).

- Designed and implemented secure role-based access (Manager/Consultant levels)
- Developed live dashboards showing project progress, KPIs and timelines
- Integrated AI-generated risk predictions and automated reporting
- Built consultant timesheet & billing automation modules
- Engineered page-navigation, multi-layout UI and performance-consistent styling
- Debugged complex lifecycle, state management and responsive behaviour

Impact: Reduced manual reporting and improved operational visibility for consultancy teams.

Additional Development Experience

- **Indie Unity Game Developer – NEKROVEXS | Nov 2023 – Jul 2024**
  Developed gameplay systems, UI, and narrative features; optimized performance across devices.

- **Game Designer – Unity Prototypes | Dec 2022 – Oct 2023**
  Designed and iterated multiple prototypes; focused on gameplay balance, UX flow, and creative direction.

Education

- **MA Human Resource Management –** London Metropolitan University | London, UK

Certifications

- **Microsoft:** Write Your First C# Program, Debug C# Console Applications, Programming with Python, JavaScript

- **SimpliLearn:** Full-Stack Development 101, SQL for Data Analysis, Introduction to MongoDB

Portfolio & Deployment

- Projects available on GitHub & portfolio website with demo videos and screenshots.

- Demonstrates cross-platform functionality, local database persistence, and maintainable architecture.
